Hello, I'm COL Sharon Holmes, the PEO STAMIS Project Manager for The Army's Distance Learning Program (TADLP).

Distance learning in the information age has unleashed the potential to take Army training to new heights. Not only is distance learning an economical force multiplier, but it will also provide soldiers stability in their personal and professional lives. Most importantly, all Army components will be able to obtain the state of readiness necessary to accomplish any Army mission.

TADLP Program Management Office was officially established in October 1997. It's dedicated to providing a quality distance learning system to all Army components in the most expeditious and cost-effective manner possible.

Since program startup in FY98, we have fielded 2,000 Digital Training Facility (DTF) seats that have trained over 40,000 students. In addition to the DTFs, Army personnel can access TADLP training from anywhere they have access to a computer. In the near future, more capabilities and features will be added to this system through Block upgrades.

We appreciate your interest in the Program. If you have any questions or comments, please contact one of my representatives, or contact me directly.
